THE 2024 MAD (MACHINE LEARNING, ARTIFICIAL INTELLIGENCE & DATA) LANDSCAPE

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Number of data tools and technologies

- In 2012, there were about **139** apps/tools/platforms relevant to data.
- In 2023, there were about **1416**.
- By 2024, this number increased to **2000+**.

Technologies and methods that support data-driven decision-making

- Technology that supports data-intensive analytics: artificial intelligence, including machine learning
- Technology that collects data and actions insights from analytics: smart devices and devices connected through the Internet of Things (IoT)
- Technology that creates transparent records: distributed ledger technologies
