Cloud-Based Solutions

- Cloud-based data governance platforms often provide lower initial costs and more predictable pricing models than on-premises alternatives.
- Organisations can reduce total cost of ownership by 30-45% over five years through cloud-based governance solutions.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Integrated Governance Frameworks

- Develop a unified approach addressing multiple compliance requirements simultaneously rather than creating siloed compliance programs.
- This can reduce duplicative controls by 25-40%.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Automation and AI

- Emerging AI-driven governance tools can reduce manual effort for data classification, monitoring, and remediation.
- Automation can lower ongoing governance costs by 20-35%.

We use cookies

Cutting costs with data

The cost of ambiguity

Proportion of time spent by information workers finding data¹

38%

How often information workers are unable to obtain relevant data²

19%

63% believe their organisation made decisions from “bad” data³

- About 530,000 days of managers' time wasted by poor quality and undocumented data (equivalent to 1.4 million in wages annually)
- By just simply documenting your data related expenses by up to 97%

Reducing risk with data

The risk of **unclassified data**

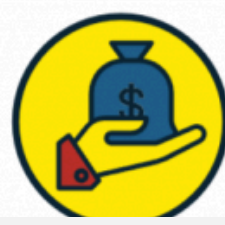

A data breach on average cost organisations **\$4.24m**

Data breaches take on average up to **287** days to identify and contain.

Of records breached, **44%** of them were customer personally identifiable information (PII)

The average cost per breached record is **\$161**.
The average cost per breach customer PII record is **\$180**

- Regulatory risk (GDPR fines, etc)
- Cybersecurity risk (both costs and customer trust)

Generating financial resources for data

- Use data valuations to pinpoint parts of the business where data can increase revenue, unlock cash flow, or reduce costs and risk.
- This gives you a concrete basis for discussions with leadership about investing in data improvements.
- Instead of requesting budget approach the CFO with solid,
- Securing funding for data gov when the financial benefits are
