

Research Data Management

Guiding Principles and Best Practices

Ernest Guevarra
University of Oxford

Tam Anh Oxfo

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

I agree

I decline

Change my preferences

Go to the people. Live with them. Learn from them. Love them.

Start with what they know. Build with what they have.

But with the best leaders, when the work is done, the task accomplished, they say “We have done it our way.”

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Who, what, when, where, why, and how of data

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Who

- who owns the data;
- who manages the data;
- who collects the data;
- who stores the data; and,
- who protects/safeguards the data.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

What

- what the data is about;
- type, nature, and provenance;
- specifies the information available, such as numerical data, text, images, etc.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

When

- timing;
- period; and/or,
- frequency

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Where

- location where the data is stored or accessed
 - database;
 - server;
 - external sources

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Why

- purpose behind collecting and analysing the data;
- guides appropriate actions based on the stated purpose

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

How

Methods used to:

- collect;
- process;
- extract

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Group exercise

Given your current research question/s, identify the **who**, **what**, **when**, **where**, **why**, and **how** of the data that you will need.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data lifecycle

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data systems

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data systems (analogy)

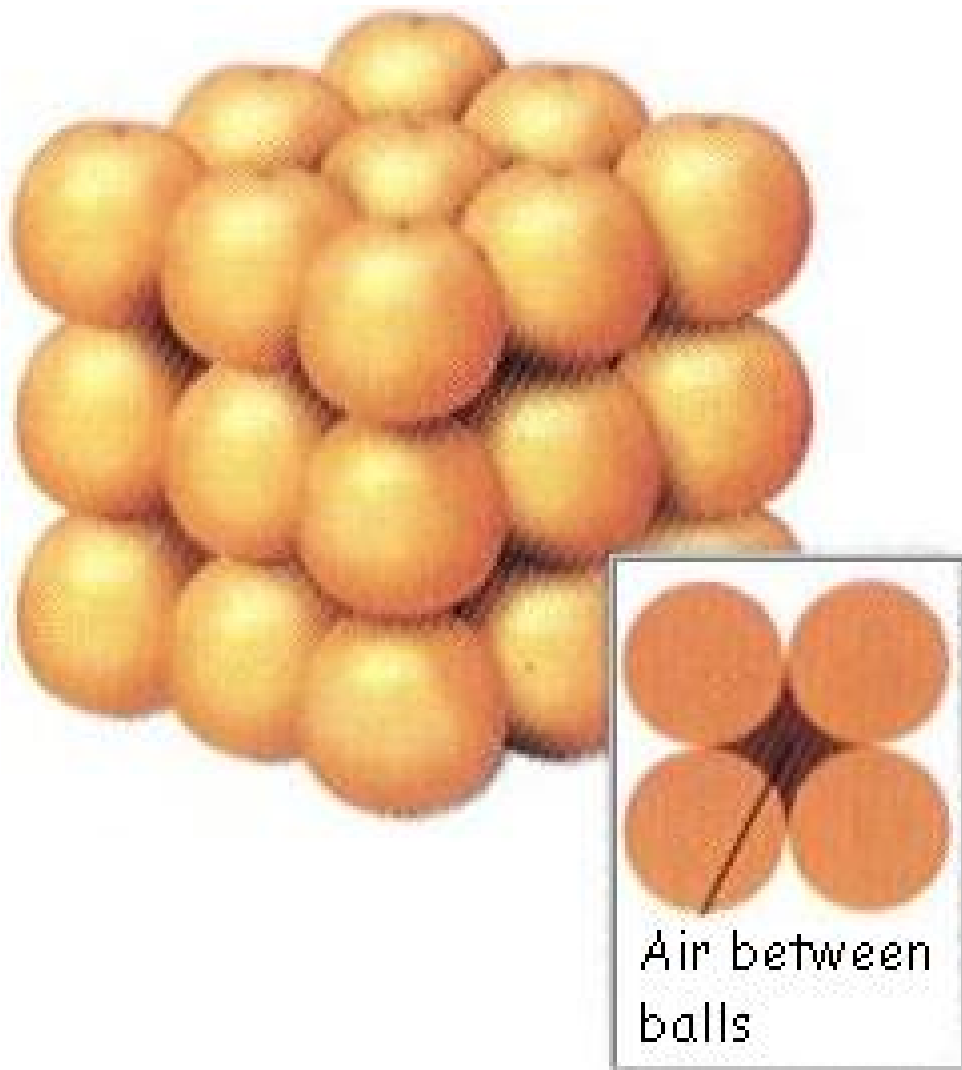

The 400-year old problem:

What is the best way to stack a collection of spherical objects, such as a display of oranges for sale?

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data systems (analogy)

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data systems

Data systems involve platforms that manage and store data effectively such as **databases** (relational or non-relational), **data lakes** holding large volumes, **big data systems** for massive datasets, and **business intelligence tools** for analytics.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data system as an organising framework for

- Most effective and efficient data structure for ...
- Most appropriate data types required/needed ...
- Formatted in a data format that is most compliant and compatible ...

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data Privacy, Security, and Protection

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data privacy and protection

Data privacy is the protection of personal information, ensuring individuals have control over how their data is collected, stored, and used. It encompasses the principles and practices that govern how sensitive data, especially personal data, is handled, including collection, storage, and access.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Principles of data privacy and protection

- The key principles of data protection ensure that personal data is handled responsibly and ethically. These principles are essential for protecting individuals' privacy and rights while also enabling organisations to use data effectively.
- The core principles are: *lawfulness, fairness, and transparency; purpose limitation; accuracy; storage limitation; integrity and confidentiality; and accountability.*

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Lawfulness, Fairness, and Transparency

- There should be a legal basis for collecting and using personal data (*lawfulness*)
- Handling personal data in ways that people would reasonably expect, and not using it in ways that cause them unjustified harm (*fairness*)
- Requires that any information about the processing of personal data be easy to understand, and that the processing be transparent (*transparency*)

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Purpose limitation

- Personal data should only be collected for *specified, explicit, and legitimate* purposes and not further processed in a manner that is incompatible with those purposes.
- specific purposes for which personal data are processed should be *explicit* and *legitimate* and determined at the time of the collection of the personal data.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data minimisation

- Processing of personal data must be adequate, relevant, and limited to what is necessary in relation to the purposes for which they are processed.
- Personal data should be processed only if the purpose of the processing could not reasonably be fulfilled by other means.
- This is linked to the principle of **Storage limitation**

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Accuracy

- Ensure that personal data are accurate and, where necessary, kept up to date; taking every reasonable step to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay.
- Accurately record information collected or receive and the source of that information.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Storage limitation

- Personal data should only be kept in a form which permits identification of data subjects for as long as is necessary for the purposes for which the personal data are processed.
- In order to ensure that the personal data are not kept longer than necessary, time limits should be established by the controller for erasure or for a periodic review.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Integrity and confidentiality

- Protection against unauthorised or unlawful access to or use of personal data and the equipment used for the processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Accountability

- Take responsibility for the processing of personal data and how they comply with the above principles
- Demonstrate (through appropriate records and measures) compliance

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Legal frameworks

- General Data Protection Regulation - UK and EU
- For Vietnam???
- These frameworks follow the same principles described earlier

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data security

- The practice of protecting digital information from unauthorised access, use, disclosure, disruption, modification, or destruction.
- Encompasses various measures and techniques to ensure the confidentiality, integrity, and availability of data throughout its lifecycle.
- Includes securing physical hardware, and user devices, as well as implementing security controls, policies, and procedures.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Layers of data security - Personal/individual layer

- Each one of us as individuals are responsible for the security of our own personal information and any other information that we own or are responsible for.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Layers of data security - Institutional layer

- institutions responsible for the security of the personal information of its own employees and/or members/affiliates
- institutions responsible for the security of the personal information of others from whom they collect information from as part of the service they render.
- institutions responsible for the security of the personal information that they own or

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data tools

Given your research questions and your answers to the previous exercise, identify data tools that you think you will need.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data tools

- Our choice of tools or the tools that we are made to use dictate how we implement the different steps in the data management pathway
- As such, our data tools also influence the resulting quality of data that we obtain

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

The dangers of spreadsheets

- The danger is real. The [European Spreadsheet Risks Interest Group](#) keeps a public archive of spreadsheet “horror stories”.
- Many researchers have examined error rates in spreadsheets. In 13 audits of real-world spreadsheets, an average of 88% contained errors.
- Microsoft Excel specifically converts some combination of character and numbers to data between operating systems, v downstream analyses.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

The dangers of spreadsheets

- Spreadsheets are often used as a multi-purpose tool for data entry, storage, analysis, and visualisation.
- Spreadsheets, by design, make humans format data to be viewed by the human eye rather than to be readable by a machine.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Spreadsheets are best suited to data entry and storage

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

**Specific recommendations for
organising spreadsheet data in a way
that both humans and computer
programs can read**

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Be consistent

- Use consistent codes for categorical variables
- Use a consistent fixed code for missing values
- Use consistent variable names
- Use consistent identifiers
- Use consistent layout in multiple data files

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Be consistent

- Use consistent file names
- Use consistent format for dates (ideally ISO format - YYYY-MM-DD)
- Use consistent phrases
- Be careful about extra spaces in cells

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Choose good names for things

- Do not use spaces in variables names and file names
- Avoid special characters
- Short but meaningful

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Write dates as YYYY-MM-DD

- recommend using the global “ISO 8601” standard, YYYY-MM-DD
- Microsoft Excel’s treatment of dates can cause problems in data. It stores them internally as a number, with different conventions on Windows and Macs. So, you may need to manually check the integrity of your data when they come out of Excel.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

No empty cell

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Put just one thing in a cell

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Make it a rectangle

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Create a data dictionary

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

No calculations in the raw data file

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Do not use font colour or highlighting as data

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Make backups

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Use data validation to avoid errors

We discuss validity errors specifically later in this slide deck.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Save the data in plain text files

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Other formatting issues with Excel
can be found [here](#)

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

We need to talk about data cleaning

Data cleansing or data cleaning is the process of identifying and correcting (or removing) corrupt, inaccurate, or irrelevant records from a dataset, table, or database. It involves detecting incomplete, incorrect, or inaccurate parts of the data and then replacing, modifying, or deleting

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

But how do we know that our data has errors?

- It depends on the data and it depends on what kind of error you are looking for
- Most of the time, when we say we are performing data cleaning, we are looking for or spotting **errors of validity**
- Validity in terms of data is the degree to which the values conform to defined rules or constraints. Some errors can be spotted “by eye”

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Validity errors

- Data type errors - values in a particular column must be of a particular data type
- Range errors - numbers or dates should fall within a certain range
- Missing values errors - missing values particularly when a value is required
- Unique value errors

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Validity errors

- Set membership errors - values should only be from a specific set of possible values
- Expected value errors
- Cross-field validation - the value in one field determines what is correct or incorrect value in another field (example: pregnant male)

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Validity errors often due to data entry errors/issues

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

But not all errors can be detected “by eye”

- Some *validity errors* and errors of *accuracy, consistency, uniformity*, and *distribution* requires exploratory data analysis to be detected.
- We will discuss these errors next week on our topic on exploratory data analysis.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

We need to talk about data restructuring

- **Data restructuring** refers to manipulating existing data to make it more suitable for analysis, storage, or other purposes. It involves changing the format, structure, or organisation of data to align with specific needs, such as data warehousing or statistical analysis.
- This is another type of data cleaning called “**data tidying**”

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data structure - Example 1

The table has two columns and three rows, and both rows and columns are labelled.

	treatmenta	treatmentb
John Smith		2
Jane Doe	16	11
Mary Johnson	3	1

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data structure - Example 2

Rows and columns have been transposed. The data is the same, but the layout is different.

	John Smith	Jane Doe	Mary Johnson
treatmenta		16	3
treatmentb	2	11	1

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data semantics

- A dataset is a collection of **values**, usually either numbers (if quantitative) or strings (if qualitative).
- **Values** are organised in two ways:
 - Every *value* belongs to a **variable** and an **observation**.
 - A **variable** contains all values that measure the same underlying attribute (like height temperature duration) across units.
 - An **observation** contains all values for a single unit (like a person, or a day)

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data structure - Example 3

name	treatment	result
John Smith	a	
Jane Doe	a	16
Mary Johnson	a	3
John Smith	b	2
Jane Doe	b	
Mary Johnson	b	

- The same data as earlier but with observations in rows.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Data structure - summary

- For a given dataset, it's usually easy to figure out what are **observations** and what are **variables**, but it is surprisingly difficult to precisely define variables and observations in general.
- A general rule of thumb is that it is easier to describe **functional relationships** between variables than between observations (rows), and it is easier to describe relationships between groups of observations (rows) than between columns.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

The standard of tidy data

- Provides a standard way to organise data values within a dataset.
- Designed to facilitate initial exploration and analysis of the data, and to simplify the development of data analysis tools.
- Principles of tidy data are closely tied to those of relational databases

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Tidy data definition

- Tidy data is a standard way of mapping the meaning of a dataset to its structure.
- A dataset is messy or tidy depending on how rows, columns and tables are matched up with observations, variables and types.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Tidy data criteria

1. Each variable forms a column.
2. Each observation forms a row.
3. Each type of observational unit forms a table.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Five most common problems with messy datasets

- Column headers are values not variable names
- Multiple variables are stored in one column
- Variables are stored in both rows and columns
- Multiple types of observational units are stored in the same table.
- A single observational unit is

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Tidy data is extremely compatible with relational databases and data collection tools that adhere to relational database

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Messy data is commonly a result of the use of data tools that do not have standards or set rules for data structure i.e., Microsoft Excel.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Project-based data workflow

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Mindset

As our skills as data analysts grow, the surrounding systems and infrastructure become crucial for ensuring the reproducibility and long-term preservation of our work. However, we often lack formal training or mentorship in managing such systems, leading to a lack of understanding of this technology or that we begin to rely on ourselves.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Mindset

- With this short course in general and this second week specifically, we hope to help you gracefully fall into this gap.
- Don't fret over past mistakes, but raise the bar for new work. Small but meaningful incremental changes add up over time, transforming your **data**

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Livestock not pets

Think of your data processes as livestock and not pets.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Project-oriented workflow

Organise work into projects.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

File system discipline

- Put all the files related to a single project in a designated folder.
- This applies to data, code, figures, notes, etc.
- Depending on project complexity, you might enforce further organization into subfolders.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

File naming

File organisation and naming are powerful weapons against chaos.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Three principles for file names

Name	Size	Modified	
 analysis for KA 1 PLAs.xlsx.gpg	412.6 kB	03:15	☆
 Attainment result term 3.doc.gpg	11.4 kB	03:15	☆
 data analysis PLAs WSI 2023.xlsx.gpg	224.7 kB	03:15	☆

- machine-readable
- human-readable
- plays well with default ordering

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Machine-readable

- avoid spaces, punctuation, accented, characters, case sensitivity.
- deliberate use of delimiters/space-holders - "_" or "-"
 - general rule is that "_" to delimit units of metadata while "-" to delimit words so that they are more readable.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Machine-readable

- easy to search for files later
- easy to narrow file lists based on names
- easy to extract information from file names

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Human-readable

- name contains info on content.
- use the concept of a **slug** used in URLs.

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Human-readable

Easy to figure out what something is based on its name

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Plays well with default ordering

- put something numeric first
- use ISO 8601 standard for dates
- add leading zeros to numbers

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.

Three principles for file names

- easy to implement now
- payoffs accumulate as your skills evolve and projects get more complex

We use cookies

We use cookies and other tracking technologies to improve your browsing experience on our website, to show you personalized content and targeted ads, to analyze our website traffic, and to understand where our visitors are coming from.
